

Working with water, one of the primary elements of nature, since the last 32 years Ripples is conscious of its responsibility, hence environment protection is one of its core business values.

Ripples is committed to:

- Comply with all applicable laws as per the environmental policy of the area in which it is working or executing a project.
- Follow a conscious approach towards the environment while planning its project execution.
- Design water features in lakes with the objective of aerating the water as much as possible.
- Ensure that none of its actions leaves any adverse impact on its area of operations.
- Protect and enhance the tree cover on all its project sites as far as possible.
- Conserve natural resources by their responsible and efficient use in all its operations.
- Ensure appropriate training and awareness of environmental systems and best practices among employees, sub-contractors and all stakeholders.
- Take utmost care while discarding waste at our plant as well as project sites to maximize recycling.
- Promote the policy of environmental protection and the importance of living in harmony with nature wherever possible in our water screen shows.
