

## Nozzles for Special Effects

Description - Nozzles for special effects are designed for use with Show Fountains such as Musical and Programmable Fountains.

Custom - These Nozzles are usually custom designed based on the fountain layout.

### Nozzle SE 1

Description - Thirteen Vertical Jet AF nozzles mounted on a single linear header. Jets can be vertical or directed outwards.

MOC - GI Header, SS Tripod, and Machined Brass Nozzles.

### Nozzle SE 2

Description - Multiple clear stream nozzles mounted in a circle on a single manifold. Jets are directed outwards to create a large flower jet effect.

MOC - SS Manifold, SS Tripod, and Machined Brass Nozzles.

### Nozzle SE 3

Description - Multiple clear stream nozzles mounted in a circle on a single manifold. Jets are directed outwards to create a vertical cone effect.

MOC - SS Manifold, SS Tripod, and Machined Brass Nozzles.

### Nozzle SE 4

Description - Three closely placed Vertical Jet AF nozzles mounted on a single linear header. To be installed in groups to create a large Sun Burst effect. Jets to be partially vertical partially directed outwards.

MOC - GI Header, SS Tripod, and Machined Brass Nozzles.
